Medan, Sumatera Utara, Indonesia

A Computer Technology student with a strong passion for fullstack web development and data management. Skilled in developing web applications from frontend to backend, along with collecting, validating, and analyzing data to support data-driven decision making. Able to work both independently and collaboratively in team-based environments.

Education Level

Institut Teknologi Del - Sitoluama, Laguboti

Aug 2023 - Sep 2026 (Expected)

Diploma in Computer Engineering

- Built a RAG-based educational website and chatbot using modern backend technologies to enable embedding-based search and contextual responses.
- Developed an IoT-based Smart Door system using sensors and microcontrollers to implement a secure automated access control system.

Work Experiences

Web Developer & Data Analyst (Internship) - Pelindo Multi Terminal

Feb 2026 - Present

- Developed and maintained an internal HR dashboard system for managing and visualizing workforce data across multiple entities. Improved data processing, reporting accuracy, and accessibility to support decision-making within the organization.
- Tools Used: Next.js, JavaScript/TypeScript, MySQL, Chart.js

Fine-Tuning a Language Model for Adaptive Computer Networks Learning Tasks - Institut Teknologi Del

Aug 2025 - Jan 2026

- Implementing RAG for Analogy-Based Chatbot Responses Developed a Retrieval-Augmented Generation (RAG) system to generate analogy-based chatbot responses, improving contextual relevance and reasoning accuracy through retrieval-integrated language modeling.
- Tools Used: Java Script, LangChain, OpenAI API, Supabase

Implementing RAG For Analogy-Based Chatbot Responses - Institut Teknologi Del

Feb 2025 - Jun 2025

- Implementing RAG for Analogy-Based Chatbot Responses Developed a Retrieval-Augmented Generation (RAG) system to generate analogy-based chatbot responses, improving contextual relevance and reasoning accuracy through retrieval-integrated language modeling.
- Tools Used: Java Script, LangChain, OpenAI API, Supabase

Website Using Analogies in Parent-Child Communication - Institut Teknologi Del

Feb 2024 - Jun 2024

- Website Using Analogies in Parent-Child Communication Designed and developed an interactive website that facilitates parent-child communication through analogy-based explanations, enhancing understanding and engagement using conversational design principles.
- Tools Used: HTML, CSS, JavaScript, MySQL

Organization

Committee of IDG (Inaugurasi, Dies Natalis & Graduation) 2024 and 2025

Sep 2024 - Sep 2025

IDG is the signature annual event of Del Institute of Technology, commemorating inaugurations, and graduation ceremonies.

Student Executive Board

Sep 2024 - Present

Joining the Department of Religion and Social the Student Executive Board of Del Institute of Technology

Student Activity Unit Head of Division 3DC

Jan 2024 - Feb 2026

Del Dance Drama Club is a Student Activity Unit that focuses on the development of acting and theater art in the campus environment.

Skill

- Soft Skills:** Leadership, Problem Solving, Teamwork, Time Management, Adaptability, Public Speaking , communication.
- Hard Skills:** JavaScript, TypeScript, Next.js, React, MySQL, PostgreSQL, Php, Supabase, Chart.js, LangChain, RAG, Git
